

What is HPC?

...an introduction

The High Performance Campus (HPC) program was created in response to a need voiced by independent school business officers and facilities directors for technical support of facilities department leadership in their schools. HPC is comprised of a mutually supportive “community” of peers across the United States. The program benefits schools by maximizing utilization of the facility audit investment, accelerating the development of facilities staff and equipping them with tools that help them perform at a higher level, and dedicated hours for special projects advising and assisting school leadership with solving strategic problems. HPC also reduces the long-term cost of keeping the campus facilities audit current and relevant as an asset management tool for school leadership.

TYPICAL QUALIFICATIONS OF AN HPC MEMBER

- you have a baseline facility audit
- “facilities” is a high institutional priority
- your staff is sufficiently engaged and proficient that it can benefit from the service
- you are active CMMS users

A FEW BENEFITS OF AN HPC MEMBER

- maximum use of the facility audit as a management tool
- real-time, on the job management training
- customized tools for more effective facilities management
- hassle-free technical advice and project feasibility evaluations
- networking with peers and best practices information
- guided collaboration of Facilities and the business office

HPC Leadership

The HPC program is administered by Kevin Folsom who brings over 35 years facilities experience.

Kevin is the Director of Special Projects. Formerly Director of Operations at Trinity Christian Academy (Dallas) and Dallas Theological Seminary, he led all aspects of campus operations and facilities management. Kevin is a co-founder of the APPA DFW chapter and chairs the national APPA Standards and Code Council.
